LANGUAGES

ENGLISH   TAMIL   SINHALA
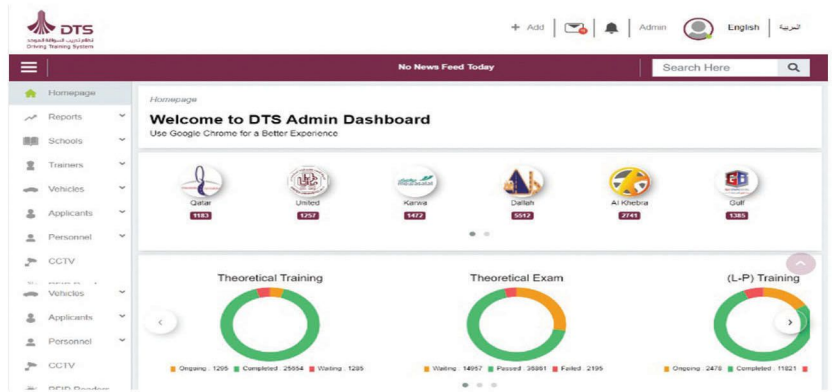

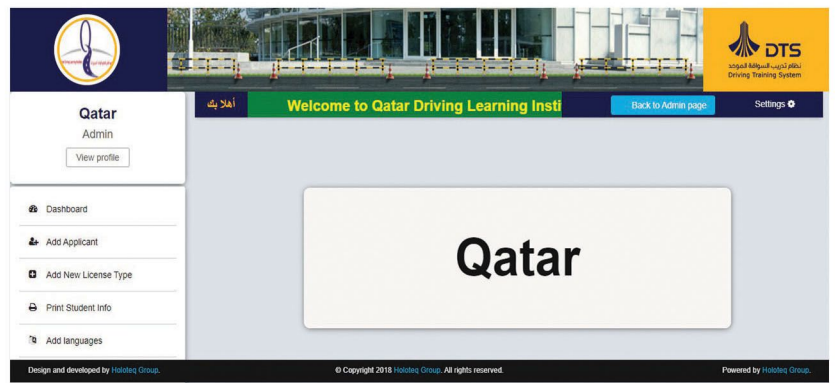

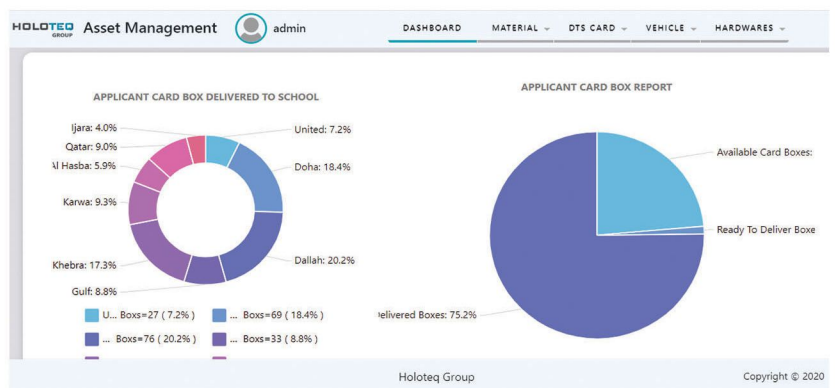

PORTFOLIO

Driving Training System Admin

The DTS admin is provided with a full database for each car used in the training so the Traffic Directorate can monitor its license permit, insurance and validity to use in training. The system is also equipped with all details of trainers and it will be able to monitor the rate of failure of any specific trainer, which means he may need more qualification and training as a driving instructor

Driving Training System

The number of schools for Driving in Qatar, which is 9 schools, is very sufficient to cover the needs of the population, and there is no need to increase this number, especially that the existing schools are distributed geographically well to meet the needs of different regions in Qatar.

Asset Management

This project is developed for our company uses to keep track of the equipment and inventory vital to day-to-day operation of the businesses

COVER LETTER

To:

Dear Manager

With four years of experience in full-stack web development and systems architecture, I am confident I will be an excellent fit for the organization or company as Software Engineer. My experience has provided me with the innovative and technical skills necessary to successfully provide your company with multifaceted technical solutions across a wide range software platforms.

At Holoteq Group - qatar, I am responsible for leading the development of asset management web application software. I oversee the building of innovative systems architecture JAVA, HTML5, CSS3/SASS, JavaScript/React, MySQL, and ElasticSearch. I was instrumental in structuring several internal systems comprising order entry/management tools, conversion/revenue reporting, and production workflow tracking, as well as designed custom Restful API's build in java also successfully collaborate on solutions with our product, QA, and network teams to offer the best user experience to build higher customer lifetime value. Also we developed a large project for qatar MOI called DTS with our team. I am resposible for UX/UI design, mobile and browser resonposive, and developed an admin dashboard using JAVA.

I worked for some frealancing projects to oversease companies in dubai, japan as a web developer. While work on remote we used slack, github for share, and build better software.

I have refined my strengths through four years of experience in DevOps, where I provided solutions in database technology, programming, operating systems. The following is a snapshot of my broader technical skills:

Agile Project Management
Web application development
Database Programming
UI/UX Design

It would be a pleasure to learn more about organization/company needs, and I would welcome the chance to provide further insight into my knowledge of software development, technical abilities, personal attributes, and track record of success in building revenue generating web technologies compatible across multiple platforms, browsers, and devices.

Thank you for considering my candidacy for this position. I hope to hear from you soon to schedule an interview.

Sincerely,

Ihsan Saleemkhan
